TECHNICAL SKILLS

DevOps & Cloud
Docker · GitHub Actions (CI/CD) · Microsoft Azure · Git & GitHub

Backend
C# · ASP.NET Core (MVC, Web API) · .NET 8 · REST APIs · JWT auth · SQL

Mobile
Kotlin · Jetpack Compose · Room

Also
Java · Python · UML / PlantUML · Networking · Security principles

EDUCATION

BCIS in Application Development
The IIE MSA · 2024 – 2026 (final year)
300 of 360 credits · 75% average · 13 distinctions

Cambridge A-Levels
Bernard Mizeki College · 2022
Computer Science, Business

Cambridge IGCSE
Bernard Mizeki College · 2020

CERTIFICATION

National Foundation Certificate
Computer Systems Installation, Servicing & Repairs
Zimbabwe MHTESTD · 2019

PROFILE

Final-year Application Development student heading into DevOps and cloud engineering. I build software end to end: ASP.NET Core APIs packaged with Docker, tested and shipped through GitHub Actions pipelines, with coursework deployments on Microsoft Azure. I care about the parts that happen after the code compiles: builds that are repeatable, tests that run on every push, and auth that actually holds.

PROJECTS

GLMS — Global Logistics Management System *Solo project*

ASP.NET Core MVC · REST API · JWT · Docker · GitHub Actions

- Designed and built an MVC web app and a separate REST API secured with JWT bearer authentication.
- Containerised the solution with Docker and set up a GitHub Actions CI pipeline that runs integration tests on every push.
- Diagnosed and fixed real integration bugs: 401s caused by HttpClient scoping, enum deserialisation errors and client/API validation mismatches.

FlexiSpace — Boardroom Booking System *Team of 6 · client WIL project*

.NET 8 Web API · Microsoft Entra ID · Graph API · Azure App Service · Azure SQL

- Owned the booking logic and conflict rules that stop double-bookings and enforce booking constraints in the API.
- Contributed to system design: UML class, sequence, state and deployment diagrams for a client-approved, Azure-only architecture.
- Worked in a feature-branch and pull-request workflow, with peer review before every merge to main.

BudgetTrackPlus *Team project*

Android · Kotlin · Room · GitHub Actions

- Set up GitHub Actions CI to run the unit test suite automatically; debugged Room database and ViewModel wiring.

CampusConnect *Solo project*

Android · Kotlin · Jetpack Compose

- Built a campus Q&A app; ran usability tests and applied Nielsen's heuristics to revise the UX.

Azure Cloud Development *Coursework*

C# · Azure web app · Azure Functions

- Built and deployed a cloud web app and a serverless Function App across Cloud Development A & B.

ACADEMIC HIGHLIGHTS

- Distinctions in Information Systems 1B (85%), Information Systems 2A (84%), Programming Logic & Design (81%) and IT Professional Practice (80%).
- Infrastructure foundations: Network Engineering 1A & 1B (79%, 76%) and Principles of Security (79%), all with distinction.
